Letter of Recommendation

I am pleased to write this recommendation letter for Md Tamzid Hasan, who is well acquainted with me as a former public health student at North South University, Bangladesh. Due to his diligent effort, sincere commitment, and hard work, Mr. Tamzid has maintained an outstanding academic record in his studies. Significant academic accomplishments have resulted from Mr. Tamzid's embodiment of the delicate qualities of ardent curiosity and perseverance in learning ever since he commenced his studies at our faculty. As an instructor of multiple courses, I observed him and found him exceptionally enthusiastic and sincere in his approach to his work. I supervised his master's thesis and highly regarded his technical aptitude and independent reasoning.

I observed that he approaches a research topic from various angles, enabling him to delve deeply. I gave him a list of things he needed to finish for his graduation, and he did all of them so effectively and on time. He is very popular among the students at this university campus, has good writing abilities, and is very time-conscious and dedicated to his work. He studied all the basic and advanced courses in epidemiology, biostatistics, data management analysis, maternal and child health, public health, etc., which inspired him to pursue a master's degree in the related field to gain advanced knowledge.

Md. Tamzid Hasan works hard and has a strong enthusiasm for research. I have experience working with students who have similar academic backgrounds, so I am confident he will be able to demonstrate himself and go on to have a successful academic and professional life. Please do not hesitate to contact me or the Department of Public Health, North South University, for further information about Mr. Tamzid.

Sincerely,

Dr. Dipak Kumar Mitra

PhD (Johns Hopkins University), MPH (Harvard University)

Dean, School of Health and Life Sciences
